Arriving Every Wednesday  
Direct From Vancouver to You!

Halibut, Salmon, Cod Fish, Soles, Etc.

## Champion Meat Market

A Want Ad. Will do it.

### Patterson-Clark

The marriage of Miss Marietta Clark, of Chilliwack, B. C., to Norman J. Patterson of Champion was solemnized in the parsonage of the First United church, Lethbridge, on Thursday April 17th at four o'clock in the afternoon, Rev. Roy Taylor officiating. The bride was very prettily gowned in powder blue georgette and carried a bouquet of lillies of the valley and carnations. She was attended by Mrs. E. G. Mifflin, who also carried pink carnations. The groom was attended by his brother, Mr. D. A. Patterson. Others present were Mr. S. O. Mifflin and Mrs. E. P. Marshall. The groom's gift to the bride was a blue sapphire necklace with earrings to match set in old gold, and to the matron of honor an emerald pendant with earrings to match. The wedding supper was served at the home of Mrs. E. P. Marshall, cousin of the bride, fourteen relatives of the bride and groom being present. The newly married couple will reside on Mr. Patterson's farm, northeast of Champion. Many friends in the community will extend best wishes for a happy and prosperous future.

A reception was tendered to Mr. and Mrs. Patterson at the home of Mrs. E. G. Mifflin on Friday evening, April 18th, at which some twenty-seven guests were present. Bridge and whist were played, Mrs. G. M. Campbell and S. O. Mifflin capturing the house in the former, while Mr. and Mrs. D. A. Mifflin vanquished all comers in the whist game. The newly weds were the recipients of congratulations from all present. The hostess served dainty refreshments during the evening.

First Half Holiday  
Wed., May 7th

The regular Wednesday half-holiday will be observed the first Wednesday in May and thereafter during the summer. This is in accord with the procedure in previous years and those interested are requested to take notice.

Campbell's have the seed spuds. Hurry.

Four tenths of an inch of moisture fell in Thursday's rain according to the local instruments at the Canadian Bank of Commerce.

Mrs. Bertha Anderson, Mrs. W. McIntyre and Mr. and Mrs. G. M. Campbell motored to Calgary on Tuesday to spend two or three days in the city.

Mr. and Mrs. Geo. Harper and family of High River visited relatives in this vicinity over the week end, returning to High River on Monday.

Mr. and Mrs. Manhard arrived back from their trip to Blackfalds without any big storm resulting. Everything seems to be going contrary this spring.

A brother to Geo. Taylor's brown dog won first prize at the Calgary dog show. We are widening out in our line of prize winning stock.

Mr. and Mrs. John Dillingham have been the guests of Mr. and Mrs. W. Ulrich, leaving for California on Monday, where they reside in future.

Mr. and Mrs. Martin Setto are receiving congratulations on the birth of a son on Wednesday, April 23rd, in the Galt hospital, Lethbridge.

### Provincial Elections Thursday, June 19

The provincial elections have been announced for Thursday, June 19th and there should be considerable activity displayed in the near future. The riding of Little Bow has been enlarged to the east, taking in Travers and territory east of Lomond, making it apparently safer for the sitting member, Hon. O. L. McPherson. As yet there are no rumors of possible candidates for the coming contest.

Baby Clinic  
Thursday, May 1

Those interested are reminded that a baby clinic will be held at the home of Mrs. U. S. Alexander on Thursday, May 1st. Former events of this kind have been highly interesting and it is hoped this clinic will be even more largely patronized. It is being promoted by the W.I.

Dr. and Mrs. Freeze  
On Vacation Trip

Dr. and Mrs. Freeze left on Saturday on a three months holiday trip, which will include coast points in its itinerary. Dr. Egbert has taken charge of Dr. Freeze's practice during the latter's absence. Dr. Egbert has been practicing at Beiseker.

B. M. Roberts Joins  
H. B. Oil Well Staff

B. M. Roberts left on Saturday for Lomond, where he will check material for the Hudson Bay well at Eyremore. Hank remains with the truck which is being used by Butler's successor with the British American Oil Co., A. W. Jopling.

Mr. and Mrs. Roy Lucia and family moved to town this week and are located in a residence in the sub division. The Misses Lucia will be remembered as having taken part in musical recitals here and will be doubly welcome to town owing to their outstanding ability in this line.

The Easter tea given by the Ladies' Aid on Saturday was not as well attended as usual but the ladies were satisfied as the handkerchief's sold well and they did fairly well.

Miss Ella Stephenson, Miss Kathleen Watkins, Miss Edna Ohlhausen, the Misses Patterson, Miss Leah Johnson and Miss Ethel McDonald were Easter visitors in town.

United Church of Canada Services Sunday April 27th  
11 a.m. Sunday School.  
3 p.m. Sanderson.

7:30 Public worship. "Are We Nearing a Revival of Religion?"

At 8:30 p.m. the second part of the circuit held on the evening of April 17th, following a Lenten service at which Rev. H. W. Dalgleish of Claremont had preached, the pastor, S. R. Hunt intimated that he had sent in the second part of the resignation committee's resignation from the Champion charge, and a request for another field. The pastor's time of service elapses at the end of June; the Settlement Committee meeting towards the end of May, when the Alberta Conference meets in Edmonton.

Legal advertisements, 15 cents per line for first insertion, 12 cents per line for each subsequent insertion.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50 cents for first insertion, 35 cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, April 21, 1933

## NOTES AND COMMENT.

While the Municipal District of Harmony is prepared to submit the necessary bylaw to the rate-payers of the district in connection with the building of the Lethbridge-Aldersley highway, before any further action can be taken the road must be definitely located and the plans submitted to the Public Utility Commission, which body will prepare the necessary bylaw. There are still a number of petitions with references to the location to be dealt with before this part of the matter may be settled and in consequence there may be considerable delay before actual building operations are got under way, in fact it is quite possible the entire proposition may go over another year.

There is a growing feeling on the part of individuals that next year would be quite soon enough to go ahead with the highway proposition, basing their opinion on the fact that the disturbance caused by the low price of wheat should be removed from the situation before the necessary obligations in connection with the building of the highway should be incurred. On the whole at the present time it would appear there is a big possibility that the necessary preliminaries will not be completed in time for construction to begin until a date too late to permit of the work being done this year.

An Ohio penitentiary is in the lime-light as the scene of one of the worst fire tragedies experienced for many years. Three hundred and seventeen dead, with additional hundreds in hospitals was the extent of the toll. The fire is supposed to have been of incendiary origin with some of the prisoners themselves as the guilty parties.

Seeding has proceeded rapidly since the rain and many farmers have completed their sowing. Nearly all have their work well advanced and it will be but a few days until the sowing of wheat will be completed.

The revolt in India seems to have lost its momentum. Had communication with other countries been as slow as it was one hundred years ago Mahatma Gandhi's pilgrimage would scarcely have been heard of. Press dispatches would appear to have greatly enlarged the gravity of the situation.

## NEWS NOTES

Four thousand articles of common use, and three quarters of the houses in Canada and the United States are made from wood. A city four times the size of Toronto could be built annually from the wood practically wasted in North America.

The time is coming when wood as hard as ebony may be

produced, by special treatment, from the quick-growing, soft textured woods, say scientists who are investigating this particular question.

High Yielding  
Seed Oats

(Experimental Farms Note.)

The suitability of a variety of oats depends primarily on its yielding ability. In northwestern Saskatchewan there is an increasing demand for a high yielding oat which matures somewhat earlier than the standard varieties. As indicated through correspondence such a demand comes principally from the more northerly districts where late varieties are in danger from frost, and also to some extent from farmers who feel that an early maturing variety will aid in combating weeds. At the Scott experimental station representatives of early, medium, and late maturing varieties have been compared for five years.

Early varieties are represented by Alaska, Cole, and O.A.C. No. 3. They have comparatively a fine short straw of fairly good strength. The kernels are usually smaller than the later varieties but have the advantage of a thinner hull. Generally speaking the yields are low, approximately 85 per cent of banner. There is no particular

advantage in growing these varieties for feed purposes except where earliness is essential.

Hulless oats are represented by liberty and laurel. Both varieties have good length and strength of straw and have rather an attractive field appearance. Considering the absence of hull their yield ranks favourably with hulled varieties. Laurel has a larger kernel, higher weight per bushel and has outyielded liberty by ten bushels per acre in a five year test. Hulless oats are not grown to any extent except as a special feed for poultry and young stock.

Medium maturing varieties are represented by Longfellow and Legacy. The former is comparatively low in yield and has no merits to recommend it. The latter variety matures five to six days earlier than banner and has given approximately two and one half bushels per acre more in a five year test.

Leader, Gerlach, Danner and Leader represent late maturing varieties. Leader is a side oat with rather coarse straw but fair length. In yield it is inferior to banner. Gerlach has done well at Scott but has no qualities to recommend it over banner which, for yield and general performance is the most popular variety grown in this province. Victory compares favourably with banner in yield. It is more popular in an exhibition oat on account of its attractive appearance and

usually higher weight per bushel.

Investigators are giving their attention to producing an oat which matures earlier than the late standard sorts but yields equally as well. One or two varieties being tested give promise in this respect.

## Recreational Resources of Canada Compose a Loadstone Which Draws Millions Of Visitors

Canada's recreational resources are a national asset of the first order. They compose the lodestones which each year draw millions of visitors to the Dominion, and they are a source of wealth which annually adds a large and rapidly growing item to the national income. There are, in fact, few records in the annals of Canadian history more interesting or more remarkable than that of the rise to importance of the Dominion's recreational features. Today the returns from these assets keep pace with those from coal, maize, iron and steel.

Some idea of the extraordinary growth of holiday traffic may be gained from the records of touring automobile entering Canada in recent years. In 1919 the number of cars entering Canada for pleasure purposes was 238,000, and during the ten years up to 1922 this figure had increased to 4,500,000. Aside from the phenomenal increase of motor tourists, railroads and ships, each year adding huge numbers to the thousands who holiday in Canada. Tapping an even wider field than the automobile, these organizations have spread the Dominion's fame as a holiday land literally throughout the world.

The most casual traveller crossing the Dominion from east to west cannot but be struck by the sheer diversity of Canada's natural features. From the great ice fields of the north shore; to the great system of inland lakes, seas in depth and size; next a thousand miles of rolling prairie; followed by the great barrier of the Rocky mountain range. And in green and finally the sea, bordering with its snow-washed waters the far flung Pacific coast. All these contribute to the glorious panorama of a transcontinental trip across Canadian territory.

The charm of the Maritime Province is not easily depicted. These provinces—Nova Scotia, Prince Edward Island, and New Brunswick—are too often written off as mere ports that capture the visitor from nearer regions. The snow-white light house crowning the cliff that overlooks the sea, the white sail of the fishing smack seeking its sheltered harbor, the winding forested ridges that straggle up the hillsides, the shaded inland roads and winding forest streams, the springtime mantle of blossoms on the clothes line, the miles of orchard walls—all these suggest the elements that blend to give the Martiniere a picturesqueness peculiarly their own. In this setting is found all that can complete the happiness of the holiday visitor—excellent facilities for motoring, boating, fishing, hunting in season, and all outdoor recreation.

Reaching from the Gulf of St. Lawrence to the Great Lakes Superior, a voyage of 2,000 miles, one of the world's great systems of interlocking waterways traverses Eastern Canada. Nowhere exists an interior water route more varied than that traversed by ship up the St. Lawrence, touching at historic Quebec and busy Montreal. Leading on through the Thousand Islands and the Great Lakes, past Toronto, Niagara Falls and a dozen other centres of population, the river itself such a voyage reveals the heart of Eastern Canada and leaves a vivid impression not only of the natural beauty but also of business life of this part of the Dominion.

The Laurentian region—the huge horseshoe skirted Hudson Bay to the east, south, and west—is pre-eminently the country of forest and stream, of towering pines and cedars, of great unbroken lakes and canoing of great unexplored beauty. Countless lakes and rivers form a network of dustless highways routing the canoeist through a hinterland where traps, muskoxen, mink, moose, deer and bear stock a superb field for the sportsman.

The prairies are less familiar as a holiday region. Yet, for thousands of

visitors, the fertile western plains with their endless miles of grazing grain present a scene of beauty and satisfaction to countless visitors. Beaches and rocky lakes, and for the enjoyment of the sportsman few fields offer finer attraction than the hunting in season of prairie game.

For scenic splendour the Rocky Mountains have been declared by many experienced Alpine climbers to be unsurpassed. Majestic ranges, scale 10,000 feet above the valley floor, are covered with a sky of pines, birch or their snow-capped peaks in fleecy clouds. Glaciers and waterfalls, emerald tined lakes and wooded valleys complete the picture. The scene of the alpine air fragrant with the scent of pine and fir. The mountains are noted for their big game—bighorn sheep, grizzly bear, Rocky mountain goat, elk, deer, moose, bison, black and brown bear, and mountain goat.

Canada's Pacific coast, with its fjords and inlets, is a revelation to the tourist. It is an all-year-round playground for thousands, while its hunting, fishing, and other sporting attractions are unequalled on this continent.

Coming into account the scope, the variety and the steadily widening renown of the Dominion's recreational attractions, there is ample ground for the view that these natural assets will, with the proper development and promotional efforts, prove to be one of the major forces of Canadian development in the next generation.

### Grain Elevator For Churchill

2,500,000 Bushel Grain Elevator To Be Completed By September 1921

Tenders for a 2,500,000 bushel grain elevator at Fort Churchill, the terminus of the Hudson Bay Railway, have been asked by the Department of Railways and Canals. The plan is to plant by the department to have this elevator completed by September 15, 1921, in time for the handling of next year's crop. As much as 200 feet of deep water dock will be constructed by that time, so that it will be possible to load ocean ships at the elevator.

It is planned to use the grain weekly. If not twice-weekly train service will be provided for the use of grain. National Railway officials and those at the Bay terminus. As there is yet no provision for people other than those actually employed at Churchill, suitable arrangements will be made to encourage from going there.

### Deadly Carbon Monoxide

Risky To Run Car In Garage Even With Window Open

In view of the deaths which are being so constantly reported due to the deadly carbon monoxide gas, it is worth while to draw attention to the warning just given by Professor Norman G. Macleod.

The figures given go to the danger of this gas are startling, as he finds that a mixture of five parts of it to 10,000 of air is very dangerous, but that one of 15 to 20 is absolutely deadly. The professor, which will be formed in a small garage in five minutes is greater than this. One particular point is urged by the professor, that it is not safe to run the car in a garage for any length of time, as the door is open, or if the wind should happen to be blowing into it this would be tantamount to closing the doors.

### Merchant Has No Comeback

Particular Breaks Plate Glass Pancake

In Store Window

When shopkeepers have plate glass windows broken, they naturally look for the price of a new one, and quite frequently get it. But in the case of A. Livingston, Bruden, Sask., merchant, who has a large plate glass window broken, the culprit gave him a flat, cold, and impudent answer when he was asked what the merchant was not even then satisfied. The culprit was a partridge which smashed the glass all to pieces when it flew against the window. Its neck was broken by the impact.

### For Improved Livestock

The first "Improved Sire Area" in Manitoba has been established in the northwestern portion of the province, an announcement made by Albert Prefontaine, Minister of Agriculture. Under the Improved Sire Area Act, all bulls, bears and rams must be inspected and improved before the owners of sires are permitted to retain them in service for their

monkeys trained to operate them are used to try out new types of parachutes in Japan.

### Strange Blue Grass Thrives In Winter

Will Grow Under Adverse Conditions Without Cultivation

Experts from the United States Department of Agriculture predict that the strange winter blue grass discovered on an Oregon farm and believed by them to be the "lost grass" of Europe, may revolutionize farming and dairying industries.

The story of the grass is a remarkable one. Similar to grass which disappeared in Europe a century or more ago, it dies down in summer, but comes up again in winter and thrives in winter, when food for live stock is low. It forms a perfect turf, even under snow.

Because experts have found it will grow under adverse conditions without cultivation, and will thrive in rainy regions, they view it as a solution of the problem of utilizing logged-off lands of the Pacific northwest.

Seeds for use in the Pacific northwest will be sold exclusively in Seattle by the Children's Orthopedic Hospital.

The agency was a gift of Mrs. M. C. Hanley, on whose farm the grass was found, and will be a source of permanent income for the hospital.

### Yellow Journals In Shanghai

People Have To Be Circumspect To Avoid Publicity

Chinese business or professional man who strays from the straight and narrow path usually reads about his sins in the local papers.

A survey made recently by military authorities indicates that there are more scandal sheets in Shanghai than any other city in the East, and that they are published in the world. One hundred and twenty tri-weekly newspapers are published in the Asiatic metropolis and are all devoted to printing scandals at print.

To keep these papers supplied with information concerning the doings of Chinese who are in the spotlight, a large army of Chinese scandalmongers is constantly kept on the job. They appear at the most amazing times and at the most inconvenient places.

### Special Type Of Piano

German Manufacture Solves Problem Of Difficult Transfer

German manufacturer

has solved the problem of how to transfer a piano from one place to another.

This is a special device prepared by a department of commerce, Tokyo, and announced in a statement from the Japanese consul at Vancouver.

The statement further remarks:

"While the import of wheat from Canada has been increasing year after year, the export of wheat to the United States is decreasing in proportion. In 1927 Canada's share was on-third of the total imported into Japan, while in 1928 it had dropped to one-half of the total, followed by Australia and the United States."

The value of Canada's wheat ex-

port to Japan was more than \$17,500,000, an increase of more than \$1,500,000.

Canada's total exports to Japan

amounted to nearly \$34,500,000, an increase of about \$1,125,000 over the preceding year. Japan's exports to Canada remained stationary at \$13,500,000.

In 1929 Japan's import of pulp

showed a decrease, but Canada con-

tinued to lead in that market with

\$22,259,999 worth, followed by Nor-

way and the United States.

## The Present Market Condition Clearly Reflects Success Of Pool Says Professor Fay, of Toronto

### Control Wolf Menace

Bounty Offered For Destruction Of Wolves In The North West Territories

The Department of the Interior, through its North West Territories and Yukon Bureau, which continues to combat the ravages of wolves among the wild life of Northern Canada. Realizing the tremendous toll taken annually by wolves primarily among the caribou, the government has offered a bounty of \$50 per wolf pelt put into effect in 1924.

Under the scheme, the trapper is paid \$50 for each wolf pelt and receives the bounty, the pelt becoming the property of the Department. In this the wolf is being made to pay for his destruction as the money received by the trapper is derived from the auction of the pelt.

"After my investigation I am a strong supporter of the Pool as it has functioned hitherto as a voluntary organization," he said. "There has been a marked improvement in Saskatchewan to make it compulsory for farmers to sell their wheat through the Pool. I am strenuously opposed to that."

The fact that export trade was improving was another indication of improvement in the wheat situation, said Prof. Fay. Considerable attention was fixed on the American winter wheat crop last year, and many improvements of exports have caused farmers to cease to worry on that score.

Improving over the general situation last year with both representatives of the wheat "trade" and the Pool, Professor Fay was convinced that North America had had most "bullish" in its wheat trading. "The wheat market is emphatically the best," he said. "The Pool was not holding back the trade as we saw it selling," he said. "The Pool was offering wheat continuously all summer and fall at below Winnipeg prices in an effort to dispose of the wheat."

"But in order to compete with the unusual Argentine crop, it would have been necessary to sacrifice grain as low as 20 cents below the Winnipeg price, which was unreason-able," he continued.

"The difficulty in 1929 was to move the limited quantity of high quality Canadian wheat to Europe, which remained unattractive to buyers on our wheat crop. There is still a question of a boycott of Canadian wheat," said Professor Fay. "The tariff wall in England and Europe is just a technical tariff protection of local growers against cheaper Argentine wheat. The bar was not directed at Canadian wheat, but the higher grade grain has suffered, with the result that the Argentine product is now held to one-half of the market, followed by Australia and the United States."

The value of Canada's wheat export to Japan was more than \$17,500,000, an increase of more than \$1,500,000.

Canada's total exports to Japan amounted to nearly \$34,500,000, an increase of about \$1,125,000 over the preceding year. Japan's exports to Canada remained stationary at \$13,500,000.

In 1929 Japan's import of pulp showed a decrease, but Canada continued to lead in that market with \$22,259,999 worth, followed by Norway and the United States.

### The Time To Advertise

Greatest Need Is When Things Are Looking Bad

There is a curious idea which causes many to believe that the time for advertising a particular product is when the market price is good.

That is not true, however, as the facts are to the contrary.

The best results for advertising, and for the best results the product in question must be kept before the public eye at all times and all seasons. When the market price of a commodity can hold to keep the demand, why is it had it can assist in creating a better demand. Indeed, it is when things are looking bad that there is the greatest need for advertising.

Has Sunless Winter

Like Hammerfest, in Norway

Prussia has a village upon which the sun never shines during the winter.

The name of the community is

Forsangvassnes, and is located in the Giant Mountans.

Two mountain shelter

the village from the winter

sun the whole day long, so that the village has nothing but twilight in which to do its work from sunup to sunset.

Heart disease, cancer and acci-

dents claimed more victims in 1929

than in former years.

A pineapple taken to London ahead

of season by a sailor was sold for \$25.

The easier a girl is to look upon

the harder a man will look.

The Canadian people have confidence in the Wheat Pool and the present condition of the market clearly reflects the success of the Pool," says Professor C. P. Fay, of the economic department of Toronto University. Professor Fay has just completed a survey of the western grain situation and will shortly proceed to England to examine the status of the Canadian Wheat Pool.

"After my investigation I am a strong supporter of the Pool as it has functioned hitherto as a voluntary organization," he said. "There has been a marked improvement in Saskatchewan to make it compulsory for farmers to sell their wheat through the Pool. I am strenuously opposed to that."

The fact that export trade was improving was another indication of improvement in the wheat situation, said Prof. Fay. Considerable attention was fixed on the American winter wheat crop last year, and many improvements of exports have caused farmers to cease to worry on that score.

Improving over the general situation last year with both representatives of the wheat "trade" and the Pool, Professor Fay was convinced that North America had had most "bullish" in its wheat trading. "The wheat market is emphatically the best," he said. "The Pool was not holding back the trade as we saw it selling," he said. "The Pool was offering wheat continuously all summer and fall at below Winnipeg prices in an effort to dispose of the wheat."

"But in order to compete with the unusual Argentine crop, it would have been necessary to sacrifice grain as low as 20 cents below the Winnipeg price, which was unreason-able," he continued.

"The difficulty in 1929 was to move the limited quantity of high quality Canadian wheat to Europe, which remained unattractive to buyers on our wheat crop. There is still a question of a boycott of Canadian wheat," said Professor Fay. "The tariff wall in England and Europe is just a technical tariff protection of local growers against cheaper Argentine wheat. The bar was not directed at Canadian wheat, but the higher grade grain has suffered, with the result that the Argentine product is now held to one-half of the market, followed by Australia and the United States."

The value of Canada's wheat export to Japan was more than \$17,500,000, an increase of more than \$1,500,000.

Canada's total exports to Japan amounted to nearly \$34,500,000, an increase of about \$1,125,000 over the preceding year. Japan's exports to Canada remained stationary at \$13,500,000.

In 1929 Japan's import of pulp showed a decrease, but Canada continued to lead in that market with \$22,259,999 worth, followed by Norway and the United States.

### Queer Sight In Cuba

Trees Grow In Limestone Areas With Little Water

Huge trees growing without any visible signs of support are one of the queer sights of the Cuban swamp of Southern Cuba, which is nearly 1,800 square miles in extent. Many varieties of trees, some 4 feet in diameter, are found growing in areas where no soil is to be seen except in small pockets and holes in the limestone, where collections of water collect and accumulate them with cover for growth.

In their search for food the roots stray about over the surface of the rock, finally ploughing through holes to find sustenance in soil hidden deeply in the cavernous recesses of the coral stone.

Nearly 5,600,000 persons with incomes of more than \$675 a year were assessed for income tax in England in the last fiscal year.

"Why do you insist on a post-mortem examination after you are dead?"

"I want to know what I die of,"—Musketto, Vienna.

"Do you worry about your old debts?"

"No, I forget old debts."

"What about new ones?"

"I let them get old."—Hummel, Hamburg.

You can't fool these two youngsters about this spring business. When there is a sound of preparations in the maple bush, the fragrant scent of burning hard wood and glint of sap pills, it's a sure sign that spring is here. Here we see "Jack" and "Jill" who didn't need to go up the hill, and furthermore, it isn't water.

"Why do you insist on a post-mortem examination after you are dead?"

"I want to know what I die of,"—Musketto, Vienna.

'Fresh from the gardens'

Catering To Tourists

Approximately twenty millions of dollars will be expended by the Government of the three Canadian prairie provinces in the construction and maintenance of good roads this year, not to mention several million dollars which municipalities will devote to other roads not included in the system of through Provincial highways and main market roads. It is a lot of work. It represents the largest single item of expenditure for any year since it may cost out of at least ten dollars for every man, woman and child in Western Canada.

A very considerable portion of this vast sum is being expended on the assumption that quite apart from the benefits that will directly accrue to the people by reason of improved roads, there will be the effects of attracting an even increased volume of tourist traffic from other Provinces and the States to the south, and that these visitors will bring much business and profit to the people through the purchases and expenditures they will make in this country. In a word, the avowed object of a goodly portion of this expenditure is to encourage visitors to tour the West.

Good roads, however, are essential if we are to have a more rapid and more certain growth. But in themselves, they are not enough. These potential tourists can find good roads, possibly better ones than we can offer, much nearer home, if a fine highway over which they can speed in comfort and safety is all that are looking for. They will come to Western Canada to enjoy a new, a virgin land. They come expecting something different.

We are going to allow our highways to be disfigured—as they have been south of the international boundary line,—by unsightly billboards and advertising devices of various kinds, defacing the landscape, obscuring the scenes beauty our cities have to offer, oftentimes confusing the drivers with their numerous signs. We are going to allow an eyesore to our great municipalities to a large extent, consisting of places of such signs on the highway right-of-way, but individual property owners must co-operate by refusing permission for the erection of billboards and the plastering of signs on private property or buildings.

Our citizens are also going to allow these signs to make their respective communities attractive to the visitor, and special attention should be devoted to the approaches to the main roads leading into and out of each settlement. The smaller the place, the more important it is that the surroundings be right, because they are noted to a greater extent by visitors than is the case in larger centers.

Community and enterprise should find expression in having all places in which visitors are interested, and must visit, as, for example, hotels, cafes, garages, post offices, as clean, neat and efficient as possible.

Gasoline and oil companies are setting a good example in making filling stations attractive in appearance, especially in larger centres, with rest rooms, washrooms, telephone stations, etc. They are out to give service. Other businesses may well enter this. Even the smallest place on a through highway can support such services.

The main highways through towns and villages should be clearly marked, and the location of such utilities as the post office, the telephone exchange, to mention but a few, prominently indicated.

Above all, courtesy should be the touchword of every citizen. If what you are is commonplace, is to them strange and new. Their desire information; then go to your way to supply it. Make them realize how welcome you are and the time when they depart, if they carry away no other impression, will at least, remember your town as one where the people were cordial, kind and helpful.

The millions of dollars that are being expended on highways is your money. Its expenditure is designed to benefit you and your community directly and indirectly. Make the most of it. This you can only do by individual and community co-operation.

### A Modern Fog Alarm

Partridge Island Signal Derives Power From Diesel Engines

The first modern light and signal station at the entrance to St. John, N.B., harbor, to be the first steam-powered fog alarm in the world, will in the near future derive its power from modern semi-Diesel engines. In addition to the power the station may again lay claim to priority, for it will be the first of the kind in Canada. Other stations on the coast of the Great Lakes have only internal combustion motors utilizing gasoline as a starting mixture and operating on kerosene as a regular fuel. The light on Partridge Island was established in 1791, and the fog signal in 1859.

**Shipments From Prince Edward**  
During the calendar year 1929, the Peace River territory shipped to Edmonton 5,350 cattle, 28,160 hogs, 1,416 sheep and 780 horses. Many other products, including sacked seed. Nearly 11,000 homes were tiled in the last two years and over 100,000 acres were broken during 1929.

**She: "Did you and your boss come to an agreement on your salary?" He: "Oh, yes; we decided to leave it as it is."**

### Changing Seasons

Brings colds and other ills—keep them off with the medicare chest. It's a great preventative.

### Skill Of Mail Pilots

No Wonder They Are Considered Aristocrats Of The Air

The skill and hardihood of the pilots who fly the mail air mail are almost beyond belief, imagination.

Not long ago Pilot Robert P.

Hopkins, flying a National Air

transport plane from Chicago to Cleveland, had to make a forced landing with a full cargo, too heavy for him when he landed at

Cleveland. The fog was so dense that he could not find the airport, and he circled helplessly for an hour and a half.

At last he made out a bit of the faint road. Circling low, he spied a city park with a little open space in the center. Down he came to make a safe landing on a patch of hard ground. After a short time it was necessary to take the wings off the plane off to get it out through the trees.

Skilled that hardly needs any comment. No wonder the air mail men are considered the aristocrats of the air!

The indications of worms are relentless gnawing of the teeth, picking of the nose, extreme pessimism often convulsions. Under these conditions there is nothing that can be got but Miller's Worm Powder.

They will attack the worms as soon as they find them and they pass away in the evacuations. The worm will be immediately eased and the continuation of the attack will not be likely.

### A Remarkable Record

To cross the Atlantic twice "every year on the White Star liner "Baltic" ever since the steamer began service more than 25 years ago, is the record of Mr. W. H. Wilcox, 85-year-old resident of Lethbridge, N.W., who has arrived at Halifax on the 55th crossing. Her first ocean trip was made on the maiden eastbound voyage of the "Baltic."

The name April is derived from a Latin word meaning "to open."

### Strikes In Canada Decrease With One Exception Last Year Most Peaceful Since 1902

With one exception, 1929 was the most peaceful year since Canadian Labor since 1902, the number of workers affected by strikes and lockouts falling to 12,924, and the days lost to 153,936. Steady progress toward happier relations between employer and employee has been registered now since 1922, the number of workers affected being as follows: 1922, 41,050; 1923, 32,685; 1924, 32,494; 1925, 25,791; 1926, 19,142; 1927, 22,083; 1928, 17,239; 1929, 12,924.

The figure for last year was only nine per cent. of the 1910 total, the year of the Winnipeg strike. Toronto reported the largest number of days lost in the year. The pattern strike involved 600 workers, and lasted 33 days, the time loss being 7,900 working days. The pasterers' strike involved 400 workers, and lasted 20 days. The pasterers' strike involved 500 workers for 12 days, causing 6,000 days' time loss.

### ST. VITUS DANCE SUFFERER MADE WELL

Nerves Strengthened Through the Use Of Dr. Williams' Pink Pills

Time after time cases are brought to the notice of the public where relief has been given by Dr. Williams' Pink Pills—where victims of St. Vitus disease have been cured. The use of these pills after other medicines have failed to be of benefit has become general. The manufacturer of the pills, Dr. Williams' Pink Pills act directly upon the blood—they make new, rich red corpuscles, and increase the purity of the blood strength the nerves and make St. Vitus dance a thing of the past.

Mrs. P. Donnelly, Montreal, Que., who is a mother of five, mother who will not add her testimony to those already published. She says:—"My little girl, aged 12, was under the care of Dr. Williams' Pink Pills. She had been under the care of several doctors prescribed for her without benefit. She was in the hospital when I saw an advertisement recommending Dr. Williams' Pink Pills. I took my daughter to St. Vitus Dance, so decided to try them. My little girl had only taken one course of treatment when she made some improvement. I continued with the treatment till now she is well and strong again. I can enjoy herself as other children do. I highly recommend Dr. Williams' Pink Pills. I am sure that St. Vitus Dance or any other form of nervous trouble, will be cured by Dr. Williams' Pink Pills."

Dr. Williams' Pink Pills are sold by all dealers in medicine or by mail at 50 cents a box from Dr. Dr. Williams' Medicine Co., Brockville, Ont.

**Needs Assistance Of Engineers To Secure the Best Social and Economic Development In Canada**

"We went westward and now we are going northward," said Brigadier General George E. Mitchell, describing the development of Canada to the American Society of Mechanical Engineers, at Washington. General Mitchell made plain the results of improvements in transportation, development of hydro-electric energy, among the people of the Dominion."

The general informed the assembled international engineers of the importance of the role of development of transportation by land, water and air of the tremendous result of the mechanization of the agricultural industry, of the "miracle of paper," and the extraordinary moral development among the people of the Dominion."

### Dry, Burning Throat Made Life Miserable

Have You These Symptoms?

"For three years I was seriously troubled with a continual cough. At night I would awaken with a dry irritable feeling in my throat. I would feel very soon my throat got into quite an inflamed condition. I used to take CATARHOZINE INHALER I was all right. I took it bed, the next morning I would wake up with a weak throat to use it regularly." (Signed) Catarhozine.

Catarhozine will not disappoint you. Get the compact, Small size, one at a dealers everywhere.

### Catarhozine A Ten-Minute Relief!

**Loss Is Unnecessary**

All Baby Chicks Can Be Raised If Properly Cared For

"There is no sense in the idea so many people have, that you have to dig on high ground a big percentage of your baby chicks," says C. E. Johnson, president of the American Baby Chick Producers' Association, and for thirty-five years a practical poultry raiser. "Start your chicks properly hatched in modern incubators. Give them the right kind of care and feed, protect them from chills and winds and from vermin and rodents, and there is no reason why every chick can't live."

"I have found that strict attention to keeping the living quarters of poultry absolutely clean is a great help. Fifth sickness disease! Cleanliness, opportunity to exercise, and proper care must be guarded against at all times."

"So long as the Chinese doctor raises his patients well, the story says, he gets his pay regularly. Whether you expect your boy to walk up to his feet when he makes them or to walk for miles, consider yourself your own poultry doctor. So long as your birds are well and thrifty they will pay you; consequently, it is up to your interest to keep them well all the time."

**Smothering Spells Couldn't Walk Far Gassed For Breath**

### Not Properly Qualified

Canadian Professor Says Universities Not Equipped To Study International Relations

Canadian universities are not sufficiently qualified for an adequate study of international relations, Prof. Norman MacKenzie, of the University of Toronto, told the House of Commons committee on industrial and international relations. He knew of no university in Canada equipped for the intensive pursuit of these studies.

The committee was considering a resolution sponsored by Mr. Frank MacPhail (P.E.I. South-east Grey), calling for the establishment of chairs and scholarships of international relations in Canadian universities. There is a lack in Canada for improvement in this respect.

Prof. MacKenzie thought parlament might well consider aiding either by grants or other means.

If the universities were given funds, Prof. MacKenzie thought, the students themselves would be developed by the universities and the students themselves.

Another suggestion he advanced was that competent professors should be invited to teach in Canadian universities in order that they may be given greater opportunities to observe the operations of international business.

Many mothers can testify to the virtue of Mother Graver Worm Extterminator, because they know from experience how useful it is.

### Preserving Historic Building

Alberta May Restore Old House Built In 1780

Old Fort Edmonton, 135 years ago built an 18-foot stockade wall, and a partial restoration, according to the statement of Premier Brownlee in the Alberta legislature.

The last building to be put down was the fort's original residence, which in 1851 stood on the ground below the legislature. The proposal seems at present concerned only with setting up a long two-story structure high, identical with this one, which dates back to the time when the fort was chief factor, between 1825 and 1854. Interest is being shown in the possible erection of a miniature of the whole layout of the early fort.

**Minard's for Falling Hair**

**Thermometers Tested Yearly**

Every year, the Physical Testing Laboratory of the Topographical Survey, Department of the Interior, tests several thousand clinical thermometers for Government departments or for the medical public. A certificate is given with each thermometer, which successfully passes the required tests.

**Dogs Have Rights**

Because he drove his car over a Boston bulldog, Robert Miller, of Hamilton, Ont., was found guilty of cruelty to animals. He was allowed to stand on suspended sentence, but must make good the value of the dog and pay \$100. Magistrate Burbridge ruled that dogs are entitled to the same consideration on the street as pedestrians.

### New Industry for Canada

**Eighteen Varieties Of Soybean Can Be Cultivated In Dominion**

Canadian farmers are finding a new opportunity in the cultivation of the soybean. During 1929 soybeans worth nearly \$2,000,000 were imported by Canadian industries. Experimental work conducted by the Dominion Department of Agriculture indicates that soybeans can be successfully cultivated in Canada. It grows under essentially the same conditions as corn, and generally speaking, can be grown anywhere corn grows, and with about the same results.

**Fresh Supplies In Demand.**—When Dr. Thomas, Electric Oil and Gas Co., presented his supplies had been ordered, showing that wherever it goes this excellent oil will be put down. The oil is produced in tanks, which are held in a tank farm at Rowland, which was chief factor between 1825 and 1854. Interest is being shown in the possible erection of a miniature of the whole layout of the early fort.

**The Modern Wolf**

The wolf that used to snuff around the door now comes up easy in the mail box, right next to the mail, and within easy reaching distance of the icebox refrigerator, the vacuum cleaner, and other necessities of life.

### Perfect dyeing so easily done!

**DIAMOND DYES contain the highest quality anilines money can buy.** That's why they give such brilliant colors to dresses, drapes, lingerie, etc.

The anilines in Diamond Dyes never fade or spot or streak. Just clear, even colors, that hold through wear and washing.

**Diamond Dyes never give things that re-dyed look.** They are just as good as the original. Perfect dyeing costs no more—is so easy—why experiment with make-shifts!

CHAPTER IX—Continued.

"Not one cent under a dollar," said Edgar Purdie, and then I'm afraid he was right. "I just needn't feel at all obliged to take them. That Darling girl will most likely snap 'em up. She's from the city and knows a bargain when she sees one."

"Well, I guess it's a good idea. I'll let you have 'em." But there's no time to waste. You've got to get on. It's quite a ride to Southwickfield, and you've got to go back home for whatever it's going to do."

"Wherever said I was going to Southwickfield?" burst from the embarrassed deacon. He was almost as red as his new tie. "Look here, Grandma Davis, don't you put those beads and such on a girl? What's he getting on. It's quite a ride to Southwickfield, and you've got to go back home for whatever it's going to do."

"Well," sighed Grandma, "seeing that you're an old friend, Edgar, and as you said, it is a bit of a particular occasion, I'll let you have 'em. But you'll have to pay me cash. Giving 'em away like this—I—"

"Oh, I'll pay cash," broke in the deacon again. "He put the beads in a little bag and took them off in Grandpa's hand and put the coveted posession into his pocket, buttoning his coat above it for extra safety. "Good by, Grandma. See you later. I'll be down to see you hard again, but he's there's times when it pays to spurn a little. You sure these beads are stylish?" he added, pausing; and at the old lady's vigorous affirmative he closed his coat.

It was as well, perhaps, that he did not stay longer, for no sooner was he safely off than Charman and the doctor came from their retreat in the next room.

"Your granddaughter seems to be in a state verging on collapse," announced John Carter. "I had hard work to restrain him from taking her to the hospital, but he insisted on the strength of the fact that Jim paid for the beads himself!" laughed Charman. "I'm going to ride with him this evening, Grandma, and shall entertain him with a account of your trip into town."

"You better warn him promise not to tell," warned the old lady. "If Sarah Bennett got hold of it, the whole thing would be town talk by nightfall. I liked as not the deacon would be up for damages—that is, if he could get Gandy Garfield to the case!"

"Here comes Edward Howe," she said, and the two girls ran to the doorway. "He's stopped and is staring at your new outfit, sony. You might run out and see if he wants you to help cut off a leg or something. And then he'll be town talk by nightfall."

"I don't know when I'd asked mom to make him come up on my offer after so much pain. When I remember—"

"But, Grandma," interrupted Charman sternly, though the corners of her mouth twirled upward, "you said you'd ask a dollar, and you said we member?"

"I said I'd make him pay a dollar," corrected Grandma. "Do you suppose, child, if I'd done in the first place, I'd have had more?"

"You don't know Edgar Purdie like I do. That's why I asked for cash. If Luella refuses him this afternoon we'd have had those beads back on our hands come night, or my name's not Davis. You can't tell me any."

When Baby Comes

W. N. U. 1834

"Up to a certain stage, I suppose they were," he replied thoughtfully, "and yet, the possession of this man for instance, is not without a twinge of heartache. It means—my having it at all—that I no longer have my parents—but that never again shall I see it for all time. It means—my leaving the living room at 'home'! It brings up memories that hurt, you see, even though I love them."

"I'm sure it would be terrible to have those memories," she said, laying an impulsive hand on his.

He squeezed her hand, and responded cheerfully: "Of course it isn't! But the first glimpse of that rug on the floor, the first time I saw it in a silly lump in the throat for just a minute. Really, it looks cooking, doesn't it? And it was like this when you sent the mittens, Charman?"

"I think it's more to the point to ask if it suits you?" laughed the girl as she wiped some dust from the old mantel.

"I think you know without the asking. It's perfect, and, as far as your principles allow, even the waiting room looks livable."

"Then you're going to stay, just as the wicker chairs you sent for?" she asked. "Yes, I think so," she broke off suddenly. "Come in, Doctor Howe, and pass judgment on the special product of our labor."

The old man stepped inside, looking about with shrewd, appraising eyes.

"Not much like my first office," he commented. "I'm afraid it's over the old drug store, hot as blazes, and musty, and proportionately cold. I think the snow fell. You're a lucky man, John Carter, with a place like this and Charman, and David to look after you."

"I realize that," responded the young M.D., with a glance at Charman that brought new color to her cheeks. "Least, I hope I have a pleasant place for my health and pleasure, for the training of my patients, and for myself."

For the past ten years this collection has been stored from view due to lack of suitable accommodation.

## KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are free from disease, may we not be doing something wrong? Almost invariably something is left undone.

It is to meet the need for an absolutely safe corrective for childhood obesity that McClary's own "Yeast" has been designed. They gently regulate the stomach and bowels and are especially useful in the treatment of constipation; break up colds and simple fevers and assist in many other afflictions.

McClary's Yeast is now available in Dover, N.H., writes: "I would like to know if you have any information as to the use of yeast for fussy babies who are troubled with colic."

McClary's Own Yeast are sold by medicine dealers or by mail at 25 cents a box. The Dr. W. Williams' Medicine Co., Brockville, Ont.

It may be just 3 weeks to change from a "skinny" tired person to a "robust" healthy one. It is the famous "Ugly hollies vanish; Broccoli limb becomes round and chubby; losing weight disappears; Bleached skin clears."

Only when you are treated in this manner will you be needed to bring out the weight-building and strengthening values of Yeast. Please send for our free booklet "How to Use Yeast."

### NO STOMACH TROUBLE

"No more stomach trouble. Can eat anything, when you feel like it, heartburn, gas, wind like magic with Phillips' Milk of Magnesia. It has been used over 50 years. No other medicine can do what Phillips' Milk of Magnesia does. It is the best medicine for stomach trouble. Quick! Get 'Phillips' from druggist today."

### WORLD HAPPENINGS BRIEFLY TOLD

The 900th anniversary of the Speyer Cathedral will be celebrated on July 12, 13 and 14 of this year.

Snowstorms in Eastern wheat country at 2° F. on April 18. April 20 and clocks were set one hour ahead.

Pilot Mermor, pilot the French duration record in a seaplane, landing after thirty hours, twenty-five minutes and forty seconds in the air.

The salaries and expenses of the pension appeal board of Canada last year were \$45,100 in excess of the awards they have made.

Production in the cotton and jute industry of Manitoba for 1928 was 1,000,000 bales, which is a little more than one-fifth of the total production for Canada.

Kaye Don, British automobile racer, had definitely abandoned his plan for attempting to beat the world's automobile speed record at Daytona Beach, Florida.

Marquis still contributes more than one half of the western grain crop, growing tests of samples taken from freight cars of Canadian wheat exported to England in 29 ships.

Plans to negotiate a parcel post treaty between Cuba and Canada are being studied by the Cuban state department. The world would see to increase in commerce of Cuban products, principally sugar and tobacco in Canada.

Thirty-four dairy herds qualified this year for honor roll certificates given to farms for the quality of their milk.

On this basis of this year introduced system of recognition 13 herds would have qualified in 1927, and 27 in 1928.

### University Students in Canada

56,042 Students Enrolled at the End of 1928

Students doing work of university standard are taking matriculation examinations at the end of 1928 totalled 56,042, of whom about 26,900 were women. Of the total 40,987 were full time students, 3,813 part time and 11,603 vacation short course extension students, 361 being drop-outs enrolled in more than one category.

There are 23 universities in Canada, of which six are state controlled.

The total teaching staff of universities in Canada, 4,071, of whom 3,544 are men and 534 are women.

In all the educational institutions of Canada the enrolment totals 2,342,391, of which 2,054,298 attend publicly controlled kindergarten, elementary and secondary schools.

"Willie, didn't I tell you to shut that shutter?" said Willie's mother. "I never shut it," replied Willie. "And I can't shut it any sharper!"

Eight ambulance airplanes now operate through the Sahara Desert.

### SUNDAY SCHOOL LESSON

APRIL 27

#### EASTER LESSON

Golden Text: "He is not here; for He is risen."—Matthew 28:6.  
Lesson: John 20:1-16.  
Devotional Reading: Ephesians 1:15-25.

#### Explanations and Comments

Mary Magdalene's Discovery of the Risen Lord. Christ, very likely, had been placed over the entrance of the tomb in which His body had been laid. The stone had been laid (Mark 15:46), and the stone had been sealed in a groove around the top of the stone covering the tomb. Early on Sunday morning Mary Magdalene came to the tomb with the intention of anointing the body. This next verse indicates that she found the stone removed. At once she hastened to tell Peter and John. John immediately refers to himself in his Gospel as "the disciple whom Jesus loved." John had been left outside the Lord's tomb, and we know not where they have laid His body.

John's and Peter's Discovery of the Risen Lord. Peter first reached the tomb, then John, reaching there first, and looking in reverence and awe. John saw a Savoy cloth body resting before him. The Savoy cloth body had rested before him only the linen clothes in which he had been wrapped. Peter had rushed into the tomb and saw a wonderful thing: that the body of Christ had been raised. John's body were rolled up, and the napkin which had been used to anoint the body had been placed. Leisurely and orderly had been Christ's departure; had others been present, the Savoy cloth clothes would not have been left. Then John also entered the tomb. The Savoy cloth body had been wrapped in a shroud. John believed that Christ was risen. "What then is man's belief?" That is what he said to himself. He further, that as He had risen, He was therefore the divine Son of God. The saving power of His Gospel, the source of life of loving devotion to the apostles.

McCallum said: "The opening of the Hudson's Bay Bay Route has been a most valuable factor in the development of the country."

Thousands of American tourists from the southern states will visit Canada this year as a result of the advertising campaign.

During the opening of the Hudson's Bay Route, stated E. A. McCallum, of Regina, who returned to the city after a three month's vacation spent in Mississippi and Alabama.

"Everyone I found the greatest interest in Canadian affairs," Mrs. McCullum said. "The opening of the Hudson's Bay Bay Route has been a most valuable factor in the development of the country."

Many of these southerners had had an idea Canada was a land of snow and deep zero temperatures, but when they had seen great country which had an ocean outlet at its extreme north."

### WHY SUFFER FROM YOUR LIVER?

Why be hampered with unquiet marches in the face, eyes with yellowish ring, and that tired and languid feeling? This indicates a torpid liver, which is a serious disease, and surely follow. You must stimulate your lazy liver, start the bile flowing, and get rid of the sluggishness.

They also act as a mild laxative, purify vegetation free from carbonic acid, promote digestion, assimilate, swallow, and not hard forming. They are not a purgative after effect following, on the contrary, a good tonic. All Druggists 25¢ and 75¢ red page.

#### Southerner's Are Anxious To Visit Canada

#### Opening of Hudson's Bay Route Has Been Great Advertisement

Thousands of American tourists from the southern states will visit Canada this year as a result of the advertising campaign.

During the opening of the Hudson's Bay Route, stated E. A. McCallum, of Regina, who returned to the city after a three month's vacation spent in Mississippi and Alabama.

"Everyone I found the greatest interest in Canadian affairs," Mrs. McCullum said. "The opening of the Hudson's Bay Bay Route has been a most valuable factor in the development of the country."

Many of these southerners had had an idea Canada was a land of snow and deep zero temperatures, but when they had seen great country which had an ocean outlet at its extreme north."

### Rubber Overshoes For Planes

#### Lace Over Wings and Prevent Formation Of Ice

Overshoes for aeroplanes—a new method of preventing formation of deadly ice—were announced at Cornell University, Ithaca, N.Y.

They are a discovery in safer flying, announced as a result of "successes in the prevention of ice."

The overshoes have gone the forward edge of the wing. They are a thin layer of specially vulcanized rubber exuding continually a colorless liquid which is the secret of the process.

The liquid is absorbed by the ice and does not stick nor the oil "scrub off."

This slipperiness alone is insufficient, and so the overshoes have a thick band under their striking edge. A slight pulsation of pump driven air in this hose breaks the ice as it forms on the wing edge, and so prevents frost from pressing the forming ice fast against the wing.

### Sodium Sulphite Deposit

#### Over One Hundred Million Tons Of Natural Hydrous Salts Found in Saskatchewan

As a result of an investigation made by the Canadian Government Department of Mines, it has been established that there are 100,000,000 tons of natural hydrous salts in the Province of Saskatchewan contain over 100,000,000 tons of natural hydrous salts. These deposits have been located on 100 of great potential value not only to steel commercial requirements in Canada but because of the possibility of developing important export markets. One of the important uses in Canada is for the manufacture of paper pulp.

"Everyone I found the greatest interest in Canadian affairs," Mrs. McCullum said. "The opening of the Hudson's Bay Bay Route has been a most valuable factor in the development of the country."

Many of these southerners had had an idea Canada was a land of snow and deep zero temperatures, but when they had seen great country which had an ocean outlet at its extreme north."

#### Everybody Satisfied

#### Family Could Enjoy Reading Paper By New Method

The latest invention is a machine which reads aloud from the printed page. This should prove a boon to the aged, the blind, and those who cannot work in the morning. They could get their morning paper, set the machine going while they whistle in the bathroom, take it to breakfast and let it run till they bid good-bye to their wife. The machine can be set to play by which time they would have heard the news paper. Then the paper could be left for the ladies of the household to read the shop advertisements, the news, etc. The whole house would be satisfied—Montreal Gazette.

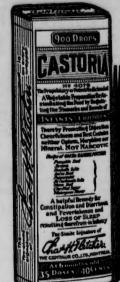

#### King Buys Stamp Collection

King George V, who is an ardent stamp collector, has purchased the famous Purves collection of Australian stamps, which was awarded the gold medal at the 1928 International philatelic exhibition in Melbourne. The price is believed to have been two thousand pounds. The collection contains examples of all kinds, many of which are unique.

Taxes for the relief of the poor have been levied in England since 1573.

Just as it has been for ages, work will continue to be the best exercise in 1930.

### Children CRY for it

It may be the little stomach; it may be the bowels are sluggish. No matter what it is, if you have a child who is not well, take Castoria. It is safe and sensible precaution to give a few drops of Castoria. This gentle regulator of the bowels system will set things right. A pure vegetable preparation that can harm a wee infant, but brings quick comfort to a child with colic, diarrhea, or similar disturbance.

And don't forsake Castoria as

#### Recipes For This Week

By Betty Barclay

#### VANILLA DESSERT WITH CHOCOLATE SAUCE

1 package vanilla junket

Prepare junket according to the directions on package. Let stand until soft, then chill.

Chocolate Sauce: Melt 1 square unsweetened chocolate and 1 cup sugar over low heat. Add 1 cup boiling water; stir constantly. 1/2 cup boiling water; add 1 cup sugar. Bring to the boil, then add 1/2 cup cold water. Boil until sauce is smooth. Serve hot.

#### Elevator Operators Must Accept Grain

Storage Reservation Not Permitted  
Under Clause In New Act

Elevator operators are compelled to take in grain submitted to them by farmers when they have accepted a clause in a new act of parliament.

Under the new Grain Act, approved by the committee on agriculture and colonization. They are not to be permitted to reserve storage space for custom grain in advance; but must take in grain as it is offered as long as there is room.

Discussion of this provision raised the question of the discretion of the elevator operator to refuse grain or not take it in, when the committee thought they should not be required to accept grain unsuitable for storage, thereby tying up storage space and preventing the movement of grain. The committee's action was left to stand over until a section covering it could be prepared and submitted to the committee.

#### London's Busiest Woman

Edmonton's busiest woman is Alice Talitha, a widow, who has just announced that she will retire after 25 years of public life. In the morning she works as scrubwoman in one of the Labor Day camps. In the evening she attends the Edmonton Education Committee or attends the Urban District Council, of which she is a member. In addition she does all her own housework and cares for the children. She says she needs a rest.

#### Where Canada Leads

Canada is the largest importer of wheat among the countries of the world and the second largest exporter of flour, being exceeded only by the United States.

### Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

### WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.  
51 Wellington St. W. TORONTO, ONT.

### Too Much ACID

You will never use crude methods when you know the better method. And you will never suffer from excess acid with the genuine Phillips Milk of Magnesia prescribed by physicians. One spoonful in water neutralizes stomach acids, and at once. The symptoms disappear in five minutes.

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with Phillips Milk of Magnesia. It has remained for 50 years the favorite with physicians. One spoonful in water neutralizes stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know the better method. And you will never suffer from excess acid with the genuine Phillips Milk of Magnesia prescribed by physicians. One spoonful in water neutralizes stomach acids, and at once. The symptoms disappear in five minutes.

Gold headings in India are thought to be more than \$5,000,000,000.

W. N. U. 1884

## EMIGRATION TO CANADA SHOWS BIG INCREASE

London, Eng.—Emigration to Canada has increased more than 25 per cent. during the past four years, although migration to dominions generally has shown a considerable falling off since 1926, it was disclosed in the House of Commons.

Hon. W. R. Smith, parliamentary secretary of the Board of Trade, in reply to a question from Mr. Bennett, said emigration to Canada had increased year by year, namely from 49,632 in 1926, to 65,558 in 1929, while Board of Trade figures showed the aggregate emigration to Australia, New Zealand and Australasia had decreased from about 119,000 in 1926 to about 44,000 in 1929.

The殖民地 also was queried with regard to Dominion emigration. Mr. Bennett, parliamentary under-secretary, stated he would circulate detailed figures later. He gave the same figures as Mr. Smith for Dominion emigration generally, stating emigration to Canada showed an annual increase.

### Twelve Rescued From Sea

**Voluntary Missionary and Family Stranded In Motor Boat**

Panama City—Stranded for nine days in a motor launch in the Caribbean Sea were Captain C. Miller, of 22, Pensacola, Fla., and his wife and nine children and a negro seaman were rescued by the Cuban gunboat "Patria" when their doom from starvation and exposure was waisted.

Miller and his family, the youngest of whom was seven months old, started out from Bocas Del Toro, Panama, for Colon, in a small motor boat. Six days later they ran out of food when only a short distance from their objective.

Days after that he watched for craft which might help him to get to Colon. Twice he signalled passing boats with a signal lamp, but when he was unable to make himself seen.

The "Patria" sighted him about three miles of Colon and brought the party of 12 to port.

The Millers are a family of "voluntary missionaries." They took Jacksonville in June, 1928, for a cruise through the West Indies, and in the course of their trip they founded the mission "Church of God" on the Isle of Pines, Cuba.

### Keeping Up Record

**World's Champion Egg Laying Hen Still Leads In Production**

Saskatoon.—Lady Victoria, world's champion egg-laying hen, is doing very well, according to her keeper, Mrs. Bertie Miller. When the University of Saskatchewan completed her first year of egg production, during which she laid 355 eggs, she did not mouth immediately but laid another 16 eggs last September.

Towards the end of December she resumed business, laying four eggs in that month. In January, February and March she worked steadily and produced as many eggs as the average Saskatchewan hen does in a year.

**Frances Protects Auto Industry**

Paris.—From 1929 to 60 per cent. higher taxes on the automobile industry became effective under a bill passed by the chamber of deputies and the senate. The government contended the law was intended merely to simplify the tax system, while changing from ad valorem to specific duties. Arguments in parliament were based upon the theory that the French auto industry needs more protection.

### Will Reinstate Clause

London, Eng.—The House of Commons has voted, 194 to 50, to reinstate in the Army Estimates bill the clause abolishing the death penalty for espionage and treason. This was the name of the Lower House to the action of the House of Lords in deleting from the bill the clause taking away with the penalty.

### Presentation For Byrd

Wallingford, Conn.—A sword wrought in gold, silver and enamel to commemorate Rear-Admiral Richard E. Byrd's achievements in geography, flying and exploration will be presented here for the State of Virginia. It will be presented by the state to Admiral Byrd upon his return from the South Polar regions.

A new electrical device can be used to seal broken blood vessels.

### Predicts Early Election

**May Be Held This Year, Says Hon. R. B. Bennett**

Calgary.—All appearances point to the calling of a Dominion election before the end of the present year," asserted Hon. R. B. Bennett, on his return yesterday following adjournment of the Federal House for the Easter recess.

"The budget will probably be delivered before the Easter recess," and there is much conjecture as to what it will contain. Unoubtedly promises have been made to the agriculturalists of Quebec and a tax will be imposed on fruit and vegetables, and the steel producers have been assured that their industry will receive protection under the new tariff."

The federal action of Australia is imposing a surtax to practically prohibit the importation of many commodities is justified by the Australian Government as the Canadian Government agreed to a duty of one cent per pound on importation of six cents per pound on importation of butter from Australia after a treaty had been signed between Australia and Canadian Government agreeing to a duty of one cent per pound on imports.

The whole problem of Australian trade is engrossing the attention of the government at the present time."

### Tariff Commissioner Retires

**Federal Veteran Of J. A. Russell Dies Banquet In His Home**

Ottawa, Ont.—Warm appreciation of the faithful and efficient service which he has given to the Dominion over a period of more than half a century was expressed yesterday in a cenotaph in honour of James A. Russell, retiring commissioner of tariffs for the department of finance.

Mrs. Miller and his family, the youngest of whom was seven months old, started out from Bocas Del Toro, Panama, for Colon, in a small motor boat. Six days later they ran out of food when only a short distance from their objective.

Days after that he watched for

craft which might help him to get to Colon. Twice he signalled passing

boats with a signal lamp, but when he was unable to make himself seen.

The "Patria" sighted him about three miles of Colon and brought the party of 12 to port.

The Millers are a family of "voluntary missionaries." They took Jacksonville in June, 1928, for a cruise through the West Indies, and in the course of their trip they founded the mission "Church of God" on the Isle of Pines, Cuba.

The government contended the law was intended merely to simplify the tax system, while changing from ad valorem to specific duties. Arguments in parliament were based upon the theory that the French auto industry needs more protection.

### Plans Return Next Year

**Hay Don Faced Many Difficulties In Trial For Murder**

New York.—John Doe's first attempt to smash the world automobile speed mark on the sands of Daytona Beach is over but the dapper little Englishman with the bristly blonde mustache will be back again for another try next year.

It has been anything but a pleasant expedition for the debonair king of Britain's amateur tracks who set forth like a scamp on a holiday two months ago to crack the world's mark of 231 miles an hour in the massive Silver Bullet built especially for him by the Sunbeam Motors of England. Twenty-two times Doe had to start over again because of the unusually rough Daytona sands without coming closer to the record than 198 miles an hour.

**Thousands Acres Sown**

Lethbridge, Alberta.—O. R. Lester has completed sowing 1,000 acres of wheat in summerfall. Several farmers of the Bow Island district have finished wheat seeding. The recent rainfall is the cause of the record that 198 miles an hour.

**Thousands Acres Sown**

Lethbridge, Alberta.—O. R. Lester has completed sowing 1,000 acres of wheat in summerfall. Several farmers of the Bow Island district have finished wheat seeding. The recent rainfall is the cause of the record that 198 miles an hour.

## CHAMPION CHATTER

VOL. 3  
Thursday, APRIL 24, 1930  
No. 19  
Published in the interests of the People of Champion and Farmers of this District  
GEO. L. DEPUE, Editor.

Congratulations to Mr. and Mrs. Norman Patterson and best wishes for their nuptial voyage.

Fred Gottschburg has taken out his third McDr. tractor. Fred knows a good thing when he uses it.

The McNaughton family have our deepest sympathy in their recent bereavement.

One of these big, strong men walked into a hardware store and said, "I want to get a set of hammers." That brown set in the window did well."

To which the salesman said, "Oh, you mean shucks?" And the salesman is still in the hospital.

Wm. Penn Motor Oils "Still the Best."

"Good Equipment Makes a Good Farmer Better."

## Local and General

Before doing your spring decorating or painting see Knox-Savyot hotel.

Mrs. J. F. Harper is a visitor in Champion for two weeks.

Mrs. E. Latif entertained to afternoon tea on Wednesday.

F. Wiss and family were visitors to Calgary last week.

Miss Gladys Woodhull is spending the Easter holidays at her home here.

Get your seed corn at Campbell's, squash and golden beans and white corn.

H. E. Gill is fencing in his acreage to the south of the town and will use it for pasture.

Mr. and Mrs. A. Ruggles entertained a number of relatives and friends on Easter Sunday.

Mr. and Mrs. Freisen and family returned on Wednesday from a motor trip to Herbert, Saskatchewan.

Mother's Day 2nd Sunday in May. Order NOW. Your plants and flowers from Campbell's.

A number of cisterns are being added to the convenience of residential properties in town.

Mrs. Andrew Diemert returned from California last week, where she has resided for some months.

Will the party who borrowed G. F. Smith's garden plow please return same at earliest convenience.

Mrs. E. Ruth of the staff of the Commercial High school, Calgary, was an Easter guest at the parsonage.

William Haines in Speedway with Ernest Torrence and Carl Dano and Anita Page. Here is a real show for Sat. night.

A Baker attended a meeting in Lethbridge on Thursday, of the Imperial Oil Co's agents of Southern Alberta, in the afternoon and evening.

Mr. and Mrs. O. B. Smith wish to thank their many friends for kindnesses during the illness of their son and The W.L. for beautiful flowers.

Messrs. O. Skjaveland and O. Running spent Easter in Calgary, returning home on Tuesday. They report a particularly enjoyable trip.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist 205-8th Ave West, Calgary will make his monthly visit to Champion Friday, May 2d, at the Drug Store.

## Albert Harris Dies at Barons

## Don't let the Cheap Paint Joker put it on you

He'll offer you paint for a little less. He'll tell you it's just as good. He'll paint and then say "I'll do it again." But you know it's not. Because "cheap" paint won't go as far as Quality A.W.P. It doesn't cover the corners and cracks. It peels. It doesn't last and colors fade. It doesn't sleep at all—it's the coating of all.

So don't let him put it over on you. S.W.P. costs a little more by the gallon, but the cost, but much less on the job.

For best results use

**SHERWIN-WILLIAMS**

For sale at Paint Headquarters by

Barons, April 22—Albert Harris, for many years a blacksmith here, passed away Tuesday, and is survived by his widow, six children and 10 grandchildren. A sad feature of the death of Mr. Harris is the fact that at the present time the family residence is quarantined for scarlet fever, which has been prevalent in the district at the present time. The family came here from Collingwood, Ont., in 1910. The children are: Wilma of Toronto, Walter of Champion, a son and Mrs. E. Wallace, Grace, Mervin, and Mrs. E. Lockett of Barons, and Mrs. Arthur Stone of Toronto. The funeral was held Thursday at 2 p.m. from the family residence at Barons.
